

ergolastec[®] CLEAN

The hygienic industrial mat with the AGR seal of approval.

- o The hygienic rubber mat is manufactured with an **antimicrobial and homogeneously distributed additive** to **prevent the formation of bacteria and fungi**.
- o The hygienic mat is suitable for application areas such as the **food industry, canteen kitchens, and restaurants**.
- o The high-quality materials ensure a relatively odourless mat, which can therefore also be **used in closed rooms**.
- o The hygienic rubber mat is **easy to clean** with commercially available cleaning agents.
- o The hexagonal hole geometry enables a large number of holes to be drilled into the smallest possible space – **this results in even faster drainage of liquids and oils**.

Surface	Size	Biocidal properties	Material	Hardness	Colour
CLEAN Dry	1350 x 1000 x 16 mm*	Fungus and	NBR**	55 Shore A	
CLEAN Diamond	1350 x 1000 x 20 mm*	bacteria-	NBR**	55 Shore A	
CLEAN Superdrain	1350 x 1000 x 18 mm*	inhibiting	NBR**	55 Shore A	

Surface and backside geometries
